

561 Quick Set Up With a PC

1. Install the software with the setup discs.
2. Run the program from the Start menu.
3. Select a Serial Port: **View/ Options**. This will usually be COM1.
4. Connect the RS232 cable.
5. Create a New file: **File/ New**.
6. Double click on Surround Controller 1.
7. Click on Owner and Fill in the customers name.
8. **Save As** your customers name: Press the **Save** button on the toolbar or **File/ Save**. This is now the customers file that you can keep for reference.
9. Go to **Settings** then to **Type Name**. Enter your customers name. This is their custom Type. (Type is all the customer settings and calibrations stored in the product).
10. Click on the icons to customise the settings to match your customers system:
 - a) **Setup**
 - b) **Speakers**
 - c) **Sources**
 - d) **Presets**
11. Switch on the 561. Store the settings to the product: **File/ Store to Product/ Everything**.
12. Calibrate the speakers with the Calibration mode. Hold down the **OFF** button on the front panel for 10 seconds. (See Users Guide). Press **OFF** when finished.
13. Load the calibrated settings back to the computer with the **Fetch** button on the toolbar or **File/ Fetch**.
14. Save the calibrated settings: **File/ Save**.
15. Store all settings to 561: **File/ Store/ Everything**.
16. Type the unit as the customers type. Press and hold the up arrow key until unit displays **Typing...** Wait. Press down arrow until unit displays customers name. (Their Type).
