9L Active

Digital Amplification Loudspeaker System

Designed to fit in today's fast-paced environment, this feature-packed loudspeaker system has a dynamic ability in its minimalist design, user friendliness, and in producing superb digital sound quality as a result of its intricate engineering and assembly. Also, its lightweight portable design makes it easy to store anywhere without having to worry about clutter.

Equipped with power-amplified speakers, the 9L Active is designed to produce studio quality sound that will provide you with a musical performance you desire. It has an array of plug and play connectivity options — a 3.5mm stereo jack that fits any portable player such as an iPod, a USB input ready to plug into any laptop or desktop computer for MP3 and MP4 playback format, and RCA high level signal inputs so you can connect them even to your mini or micro Hi Fi component systems, add to that a card-sized system remote that lets you control the volume and input source from anywhere inside the room.
