

THE QUAD II IN THE WORLD—No. 4

The 'TORRE DE BELEM', Portugal.

also in Portugal

QUAD II AMPLIFIER

In Portugal, too, the QUAD II Amplifier is being used in the homes of those who appreciate music, in the monitor rooms of the Emissora Nacional de Radiodifusão, and, of course, for the recent 'Festival Hall' demonstration in Lisbon by Mr. G. A. Briggs and Acoustical Agent, Valentim de Carvalho, in which live and recorded items were played under conditions of direct comparison. Throughout the world the QUAD II is used for the *closest approach to the original sound.*
