

The Quad ESL-63 and Compact Disc.

Two steps closer to the original sound.

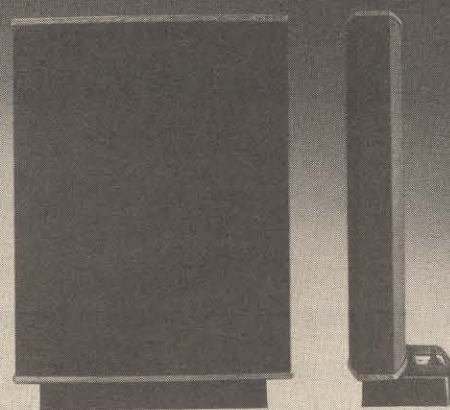

The Quad ESL-63 sets new standards in three important areas of loudspeaker technology, low distortion, low colouration and controlled directivity, resulting in a level of performance limited solely by the quality of programme source.

With Quad ESL-63's and a compact disc player less than 0.1% total harmonic distortion* intrudes between the listener and the studio master tape, reproducing exactly what was recorded, nothing added, nothing taken away and bringing the listener that much closer to the original sound.
