Press release

Meridian Audio Announces Series of Powerful Performance Upgrades

Meridian Audio's research team has announced a series of powerful performance upgrades to the company's most advanced products such as the **808 Signature Reference Compact Disc Player** and **861 Reference Digital Surround Controller**. Meridian has also upgraded the performance of the **DSP7200 Digital Active Loudspeaker** with new DSP developments including a new psychoacoustically based feature to allow the adjustment of image height in home theatre applications.

808 Signature Reference CD Player

The Compact Disc still offers the widest music catalogue and exceptional quality - particularly if replayed through the highest-class system. Meridian was an early leader in CD playback technology, and Meridian's 808 delivers on the ultimate promise of the Compact Disc. This latest edition 808 includes improved technology and components that enhance audio quality in a number of areas. There is also a plate commemorating 30 years of the format along with the signatures of Meridian's co-founders.

861 Reference Digital Surround Controller

Meridian invented the digital surround-sound controller, and the highest expression of the art of surround-sound is provided by the latest edition of the 861 Reference Digital Surround Controller. With unparalleled surround-sound playback capabilities, the new version of this product includes improved technology in a number of areas and the addition of brand new features such as the ability to manage centre-channel height imaging in conjunction with the new **DSP7200HC** loudspeaker.

DSP7200 Digital Active Loudspeaker

The DSP7200 has been a popular part of the Meridian Digital Active Loudspeaker range since its introduction in 2007. Now with improved technology and components, it provides even purer audio performance, while new DSP developments provide additional features including innovative music modes and, in the Horizontal Centre version, a new proprietary psychoacoustically-based feature called Centre Elevation that allows the adjustment of image height in home cinema applications - delivering a truly seamless experience when integrated into the Meridian Digital Theatre system.

ABOUT MERIDIAN AUDIO

Meridian Audio is based in Cambridgeshire, UK, and was founded in 1977 by psychoacoustics expert, Bob Stuart and design engineer, Allen Boothroyd. With over 35 years' history of innovation and development of uncompromised consumer home entertainment systems offering exceptional performance, this award-winning company is widely recognised as a world leader in high-quality audio and video reproduction. Meridian developed the first audiophile CD player, the world's first consumer digital surround controller, and the MLP lossless packing system included in Blu-ray Disc. The company's optical disc players, DSP-based loudspeakers, video projectors, and scalars are unique in the industry, maintaining a super-quality digital signal throughout the path from the studio to the home, using advanced digital signal processing to deliver natural sound and smooth, crystal-sharp images with true cinematic realism. In 2008, Meridian established its Automotive division and has since developed in-car entertainment systems featuring their unique Trifield technology for models including the McLaren MP12C supercar, the Range Rover Evoque, and more recently, the luxury Jaguar XJ Ultimate.
