

Twinstore

The Twinstore is a network attached storage device. It features two removable hard disk trays; one for primary storage and one for mirrored backup storage. All mirroring takes place automatically, giving you a zero-downtime backup of your library.

With a pair of one-terabyte hard disks, the Twinstore provides mirrored storage of about 2,400 albums. Music is stored as lossless FLAC audio files for use by the Sooloos system and as MP3s for export to your iPod or other portable device.

Like all Meridian Sooloos components, the Twinstore connects to other devices in the system over standard TCP/IP Ethernet, using CAT5/5e/6 cables with RJ-45 connectors. This allows the Twinstore to be located outside the listening environment for silent system operation. Unlimited Store Series components can be added to a system for additional storage.

The operating system is stored in read-only flash memory, which greatly increases reliability as it cannot be corrupted.

Technical Specifications:

DIMENSIONS:

430 x 70 x 364mm / 17 x 2.75 x 14.6in (WHD)
Dimensions include non-removable feet

WEIGHT: 5.8kg (12.8lb)

NETWORK CONNECTIONS:

1 Ethernet (RJ-45) or Neutrik EtherCon

POWER CONNECTIONS:

12V DC input, external AC adapter 110-230V
Removable IEC 3-prong power cable

REMOVABLE DRIVE TRAYS (X 2):

Form Factor: 3.5 inch SATA
Drive Type: Serial ATA (SATA) – 7200 RPM
Connectors: SATA Data and SATA Power

STORAGE CAPACITY/EXPANDABILITY:

1 Terabyte = Approx. 2400 albums
Twinstore components can be added without limit

REAR VIEW:

Twinstore

All the features of a Twinstore in a standard 2U rack mountable chassis. Includes an internal fan and a front-mounted power switch.

Technical Specifications:

DIMENSIONS:

424 x 89 x 390mm / 16.7 x 3.5 x 15.4in (WHD)

WEIGHT: 5.8kg (12.8lb)

POWER CONNECTIONS:

115V/230V switchable,
Removable IEC 3-prong power cable

COOLING: Internal fan
